

Incident Response Report — IR-2025-001

INCIDENT RESPONSE REPORT

Incident ID: IR-2025-001

Date: 2025-08-18

Analyst: Rushikesh pawar

Severity: P2 — High

EXECUTIVE SUMMARY

A simulated phishing attack was detected targeting employee email accounts. Attack was contained within 2 hours with no data exfiltration confirmed.

TIMELINE

10:00 — Phishing email received
10:15 — Employee clicked malicious link
10:20 — SIEM alert triggered
10:35 — System isolated (Containment)
11:00 — Malware removed (Eradication)
12:00 — System restored (Recovery)

ROOT CAUSE

Spearphishing email (T1566.001) delivered due to lack of email filtering.

MITIGATION STEPS

1. Deploy email filtering (SPF/DKIM/DMARC)
2. Enable MFA on all accounts
3. Mandatory phishing awareness training
4. Improve SIEM alert rules

LESSONS LEARNED

- Detection delayed by 15 min — improve SIEM rules
- Containment playbook worked effectively
- Employee training needed immediately
